Subject: Tripterygium

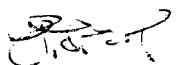

To: Dr. Robert E. Perdue, Jr.
Botanist, U.S.D.A.

Following our telephone conversation, we have had the following Tripterygium accessions beside those of Dr. Beroza:

B 614030	<u>T. regelii</u> Hook.f.	FR LF ST	Penna. (Morris Arboretum)
		07/59	SKF
NSC-18690	<u>T. sp.</u>	LF	Md., 08/51 EURDD #1311
NSC-19342	<u>T. wilfordii</u>	LF	Md., 10/51 EURDD #1659

Beroza, in one of his papers, reports that he had two lots of fresh T. wilfordii roots collected in Wellborn, Texas, early in 1949 and 1950, and 100 kg. of dried roots collected in 1940 at Glenn Dale.

Would you be able to look into these sources?

Jonathan L. Hartwell
Head, Natural Products Section
Drug Development Branch, DRD
Chemotherapy, NCI

Chinese drug
Sold in Kowloon

Lloyd - Can you check this further
Beroza may remember something
about his source in Texas.
Telephone Morris Arb. to see if
any still there

Nursery NW of Baltimore
may have Tripterygium
