MEMORANDUM

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
PUBLIC HEALTH SERVICE
NATIONAL INSTITUTES OF HEALTH
NATIONAL CANCER INSTITUTE

DATE: February 14, 1980

TO : Dr. James A. Duke, EBL, USDA

FROM : Dr. Matthew Suffness, PAPS, NPB

SUBJECT: Printout of genera screened

Rich Spjut asked me for a printout of genera screened and activity in various genera as a quick guide to field collection.

I am sending three copies of this printout to you since I thought it would also be useful for Gudie and Sandy to have.

There are a number of obvious misspellings of names which Gudie can correct when she gets our tapes of the header file.

It is interesting to note that we have only screened about 6500 genera, and figuring about 5% misspelling in generic names it would really be only about 6150 genera and probably less if one also counts nomenclatural duplication where two or more names are used for the same genus.

Matthew Suffness
